

Improving For You

Upgrades ongoing at the North Sydney and Port aux Basques Terminals

As part of Marine Atlantic's commitment to inform our customers of the many activities related to our shore-based renewal program at our terminal properties this fall and winter, continuous updates will take place during the construction phase. Our project plan has been designed to have as little impact as possible on our customers and operations during this period.

For the information of our commercial customers, shower facilities at the Port aux Basques terminal will be taken out of service as of Tuesday, November 13. This is a temporary shutdown as this scope of work will be completed in January. We look forward to providing our commercial customers with a first-class commercial drivers lounge this spring as a result of these efforts.

Your safety is important to us.

During the construction phase, contractors will be working at various locations throughout our terminal properties. While the project plan has been designed to minimize the impact on our customers, we ask for your assistance during this period of increased activity. Please familiarize yourself with posted signage and avoid construction areas.

If you have any questions regarding our renewal process, please feel free to speak to a member of our team. Thank you for choosing Marine Atlantic

Andrew Tobin
Manager of Customer Relationships
