

Improving For You

Upgrades ongoing at the North Sydney and Port aux Basques Terminals

We are committed to inform you of the many activities related to our shore-based renewal program at our terminal properties this fall and winter through regular updates during the construction phase. Our project plan has been designed to have as little impact as possible on our customers and operations during this period.

This week, the Port aux Basques restaurant facilities will temporarily close to allow upgrades in the kitchen area. A mobile food service unit will be available during this time. For the information of our commercial customers, shower facilities will continue to be out of service at the Port aux Basques terminal. This is a temporary shutdown as this scope of work will be completed in January.

Your safety is important to us.

During the construction phase, contractors will be working at various locations throughout our terminal properties. While the project plan has been designed to minimize the impact on our customers, we ask for your assistance during this period of increased activity. Please familiarize yourself with posted signage and avoid construction areas.

If you have any questions regarding our renewal process, please feel free to speak to a member of our team. Thank you for choosing Marine Atlantic.

Andrew Tobin
Manager of Customer Relationships
