Marine Chief Engineer

Marine Atlantic is a federal Crown corporation that provides a vital ferry service link between Newfoundland and Labrador and mainland Canada.

We are dedicated to creating an environment which promotes employee growth, career development, and job satisfaction. Some benefits of working with Marine Atlantic include competitive salaries, defined benefit pension plan, comprehensive health benefit packages, professional development opportunities, and travel pass privileges on our vessels. Come experience the pride of working with an organization with newly constructed and revitalized infrastructure that has positioned itself for the future.

Marine Atlantic has an immediate opening for Chief Engineers to work onboard our vessels that operate from the ports of Port aux Basques NL and North Sydney NS year round and Argentia NL during the summer season. These are permanent full-time positions that are scheduled across our four vessels and each tour.

Reporting directly to the Master of the vessel and functionally to the Technical Superintendent, the Chief Engineer is responsible for all maintenance activities performed on board. The Chief Engineer will lead the engine room department and maintain a safe and efficient operation of all vessel equipment. This position is responsible for all engine room employees, including our electrical division, making this a critical role in leading, managing, and developing their team. The Chief Engineer plays an integral role in developing, maintaining, and promoting a strong safety culture on our vessels as well as managing related environmental programs on board.

Education:

Valid First Class Motor Certificate STCW 95
